Date of hosting Event	<i>July 2014</i>
Location, Country	<i>Usurbil & San Sebastian, Spain / Basque Country</i>
Target Group(s)	<i>Companies (SME) and academic institutions, schools, participants</i>
Language	<i>en, eu</i>
No. of participants	<i>13 (consortium), 26 (workshop), 8.577 (Summer Courses total)</i>
Person in charge	<i>Lorea Arakistain Aizpiri, Danel Solabarrieta Arrizabalaga, Josu Waliño Pizarro</i>
Description	<i>The SciCamp partners met in project month 20 for the third time for a consortium meeting and the conduction of a public Summer Course about Science Education.</i>
Conclusion	<i>After an informal meeting on the evening of the 6th of July the conference started with the conduction of the two days' workshop "Challenges of Science Education: Moving toward Europe, and the local model" inside of the 23rd Summer Courses of the University of the Basque Country. A familiar round of teachers and members from academic institutions and companies shared experiences and developed strategies to enhance Science Education in general and on local level. The official consortium meeting was held the day after. The final Exploitation Report was discussed together with its supplementary video material. Furthermore, there were talks about next dissemination events and the project-website, especially with the new camps-map feature to enhance awareness of Science Camps in Europe. After the session to plan the conference in Berlin, the consortium tested the Play-Decide Game which is related to the Best-Practice Report. The second conference with all activities was very well organized by the partner ELHUYAR.</i>
