SciCamp-Event Title	3. SciCamp Conference
Event form	Conference, Panel, Poster-Session, Workshops, Presentations, Networking
Date, Duration	07.10.-09.10.2015, 3 days

Location, Country	Berlin, Germany
Target Group(s)	<i>Companies (SME) and academic institutions, schools</i>
Language	<i>en</i>
No. of participants	<i>20 (consortium), 54 (public conference)</i>
Person in charge	<i>Martin Lindner, Christian Kubat</i>
Description	<i>With international guests the consortium shared and discussed their findings and exchanged with different actors on a 3-days event in project month 35 in Berlin.</i>
Conclusion	<i>The conference started with an informal conference dinner with almost 30 participants on the first evening. The day after the first conference day was conducted in the rooms of the Germany Museum of Technology. After the official opening with three different views on Science Camps (organizers, participants, evaluators), many active methods were used to exchange and supply network-opportunities. The lists of guests were composed of well know partners of the consortium and interested persons with different backgrounds. On the evening all participants connected further at the official conference dinner. The last day was again given to workshops and a summary about the conference. After a fairwell-lunch the ending was open within the visit of the interactive Science Exhibition in the Science Center Spektrum. Many participants gave a very positive feedback to the conference as a great opportunity to exchange and develop the own skills relating to the organisation of Science Camps. Especially the involvement of Science Camps participants as Keynote-Speaker and a wide range program-elements was perceived very fruitful.</i>
